

The Industry

The fast paced growth of emerging markets and growing global demand for commodities has placed enormous stress on the resources and operational efficiency of the global supply chain. Coupled with increasing market volatility, organizations need to control risk, exposures and maximize their operational efficiency now more than ever.

In this constantly evolving world, being on the forefront of information can improve your trading operations and business productivity. With the most updated market intelligence, your trading operation becomes more lithe and efficient when you make knowledgeable business decisions.

About Us

JustCommodity has been successfully delivering Commodity Trading and Risk Management (CTRM) solution provider in the multi-commodity space. Our client list represents some of the largest and most successful corporations globally

Our solution, ContraXcentral™, is a web based solution which improves the efficiency of trade lifecycle by seamlessly integrating front, middle and back office processes – all within a single and automated information platform.

ContraXcentral™ solution is complemented with our team of expert consultants with many years of industry experience behind them and our excellent support infrastructure.

Our Core Product - ContraXcentral™

ContraXcentral™ is the premier contract management and execution software suite, specially designed to support the needs of commodity trading houses. ContraXcentral™ Edible Oils is built with expert Edible Oil domain knowledge, incorporating the current industry practices and regulations including rules from PORAM, MEOMA and FOSFA. The ContraXcentral™ framework is flexible, configurable and customizable to suit the needs of individual companies.

Seamless Workflow – Integrated Support Functions

Processes of all functions will run flawlessly with ContraXcentral™ contract-centric platform where all commodities contract cycles and positions are managed. It supports all back-end functions that influence communications and updates all contracts for internal and external party review, giving you a smoother trading flow.

Optimized Returns – Streamlined Data at a Glance

Through data extraction on company and trader related activities, external and internal risks can be managed and monitored. By identifying areas which require consolidation of information and creating reports and alerts based on these data, ContraXcentral™ communicates accurate data easily and also keeps mistakes and time consuming errors to a minimum.

Real Time Reporting – Adding Value to Data

Competitive performance depends on agility and access to information. ContraXcentral™ gives soft commodities trading firms an edge with thorough trading and risk report functions across the commodity process. Derivative and physical trades are managed efficiently with easy-to-generate contracts and tracking systems that proficiently manage the entire trade cycle.

Testimonials

In searching for an IT Trading System, my criteria are effectiveness, competitiveness, reliability and good support and back-up services. I found that Just Commodity's ContraXcentral system meets these requirements. I am pleased that I have made the right decision.

**Mr. T.C Ong, Head of International Trading,
Golden Agri-Resources**

"It may have taken more time than I would have liked to select our technology partner, but I believe I have made the right choice by teaming up with Just Commodity."

**Mr. Yong Chin Fatt, Director
IOI Commodity Trading Sdn Bhd**

IT was able to work closely with JustCommodity to get our requirements met. CXC is tailored to meet our standard procedures, and we do not have to jump through hoops to get things done. They have a deep understanding of the Commodity Trade, making them ideal partners to co-develop the systems. JustCommodity has been able to make ContraXcentral flexible so that it is tailored to our requirements rather than the other way around.

**Mr Albert Koay, CIO, Group IT
Kuala Lumpur Kepong Bhd**
